

WiseBox[®]

The indoor and outdoor solution

Data sheet

Description:

WiseBox[®] exploits the innate desire of the rat to seek safety in holes, crevices, etc.

When the rat enters WiseBox[®] and activates the sensors of the trap, the trap closes and the rat is dispatched quickly and efficiently.

The dead rat is deposited in a plastic bag in a sealed container and WiseBox[®] is then ready for the next rat.

WiseBox[®] is a self-emptying surface trap, which is positioned in the rats' permanent routes along buildings, both outdoors and indoors.

The battery powering the trap can be charged via solar cells and can be coded to send SMS and/or e-mail messages to the owner of the trap to provide an overview of the operational data for the trap and when the trap should be emptied.

WiseBox[®]

Data sheet

Control:

Electronic control using GPRS data transfer to WisePlan and mobile phones.
GPS positioning/monitoring.

Positioning:

Along buildings and rat tracks.
Can be used to combat rats and mice both indoors and outdoors.

* ordered separately

Power supply:

12 Volt rechargeable battery.
WiseCon standard charger.

Battery capacity:

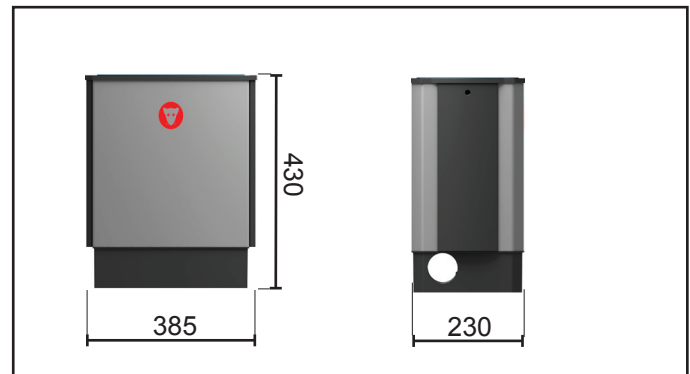

Without solar cells: approx. 3 months.
With solar cells: 3-12 months depending on positioning.

Plastic material:

PP, PA.

Airtightness class:

IP 44

Item description and number:

WiseBox with solar cell	Item no.:	200 100
WiseBox without solar cell	Item no.:	200 110

Weight excl. battery:

7 kg

Ordering information:

The following must be specified when ordering:

- WiseBox item description and item number

Necessary accessories:

Battery	Item no.:	200 900
Charger	Item no.:	100 910
Key	Item no.:	200 940
Waste bags (5*20 off)	item no.:	200 910

Installation equipment:

Installation tool	Item no.:	200 920
Installation screws	Item no.:	200 930

Supplied excl.:

Key, battery, charger and installation tool
Drill bit required (concrete): \varnothing 6.5 mm
